DETAILED ACTION

Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, such as Zijsling, Drummond et al, Swietlik, and Nunley, all teach drill string having at least one bearing zone having at least one bearing segment for bearing against the wall of the borehole for reducing surface contact with the borehole during directional drilling, the prior art of record, however at least fails to teach or suggest the bearing segment being of convex curved shaped cylindrical structure, and having substantially constant outside diameter; the bearing further presenting a meridian having a radius of curvature no less than one-third of the diameter of the bearing segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zijsling, Drummond et al, Swietlik, and Nunley, all teach drill string having at least one bearing zone having at least one bearing segment for bearing against the wall of the borehole.
